PROJECTS

Feb 2022 - Present

A simulation of the **google breakout game** with user friendly functionalities rated by tens of people, created with the use of Python turtle and critical thinking.

[source code](#)

A "Dangerous Typing App" that makes one an efficient writer, by keeping one writing. When you stop writing for a given time, all you previously wrote would be deleted. This has helped increase my thinking speed a lot. Implemented the use of Python TKinter and creative thinking.

[source code](#)

A simulation of the **space invaders game**, with awesome audio giving users wonderful experience. Implemented the use of Python Turtle graphics.

[source code](#)

Built the backend of **Furnise an e-commerce** to have a secure functionalities and amazing user experience. Built with Python Flask
