EXPERIENCE

Software Developer Advocate and Community Manager, Social Media. Feb 2022-Present

- Contributing to the growth of over half a thousand younger developers trying to understand their base in software development by coaching on social media platforms. Helping aspiring software developers choose a niche to suit their desire.

PERSONAL PROJECTS

- A simulation of the google breakout game with user-friendly functionalities rated by tens of people, created with the use of Python turtle and critical thinking. [Source code](#)
- A "Dangerous Typing App" that makes one an efficient writer, by keeping one writing. When you stop writing for a given time, all you previously wrote would be deleted. This has helped increase my thinking speed a lot. Implemented the use of Python TKinter and creative thinking. [Source Code](#)
- A simulation of the space invaders game, with awesome audio giving users a wonderful experience. Implemented the use of Python Turtle graphics. [Source Code](#)
- Built the backend of Furnise e-commerce to have secure functionalities and an amazing user experience. Built with Python Flask. [Website](#)

EDUCATION

Bachelor of Engineering, University of Nigeria, Nsukka, Nigeria.

2019-Present

- *Department of Mechanical Engineering*
